Quick Question

Ionization of hydrogen from the ground state requires photons with wavelength less than 91 nm. About what is the minimum wavelength from the n=2 level?

A. 45.5 nm
B. 125 nm
C. 182 nm
D. 364 nm
E. There’s not enough information to answer.
Quick Question

Ionization of hydrogen from the ground state requires photons with wavelength less than 91 nm. About what is the minimum wavelength to ionize H from the n=2 level?

A. 45.5 nm
B. 125 nm
C. 182 nm
D. 364 nm = n^2 91 = 4 91
E. There’s not enough information to answer.
